or call

Join our workshop!  
Homebased  
microprocessors are  
farmers who grow and  
harvest produce to use in  
their value-added products.  
Homebased  
microprocessors are  
required to grow a  
predominant ingredient in  
the products they make.  
The first step to becoming  
certified as a homebased  
microprocessor is to attend  
a Homebased  
Microprocessor (HBM)  
workshop presented by the  
University of Kentucky.  
The cost of the workshop is  
\$50.00.
